# PROJECTS

## **Solidarity Home Health Care**

PHP, WordPress, ACF, MySQL

URL : <https://solidarityhomehealthcare.com/>

- I designed and implemented a custom theme
- seamlessly integrating an HTML theme for enhanced aesthetics and functionality.
- Additionally, I set up robust email services and created a custom post type for efficient content management.
- These tasks showcase my proficiency in web development, design, and system optimization.

## **Animationdx**

PHP, WordPress, ACF, MySQL

URL : <https://animationdx.com/>

- In this project, I crafted a bespoke theme, organized posts by creating a taxonomy system, added engaging animations for user appeal, and optimized content creation with Advanced Custom Fields (ACF).
- My role encompassed a holistic approach to web development, ensuring a seamless blend of design, functionality, and user experience.

## **Coderscotch**

PHP, WordPress, ACF, MySQL

URL : <https://coderscotch.com/>

- Developed a custom theme, incorporating unique design elements to enhance visual appeal and user experience.
- I implemented custom fields and optimized the admin panel, empowering administrators to dynamically manage all content, including images and text, with ease.
- I integrated email services, established a taxonomy system, and implemented a custom post type, enhancing the overall functionality and content management capabilities.
